

Our new range of manual feed hoppers allow customers to store bagged wood pellets in a clean and dry environment. Pellets can then be manually extracted into a bucket or other small container as required and loaded into the built in store of a pellet boiler or stove. Supplied in both 250kg and 500kg sizes these hoppers can be shipped pre-built or flat packed depending on customer preference and can be assembled in minutes.

STANDARD FEATURES

Liftable Lid

Waterproof hinged lid for loading bagged fuel

Feed Outlet

Easy to use slide plate allows for manual extraction of the fuel
